(72)Inventor : HONMA KOICHI

(54) INFORMATION PROCESSOR, PRINTING DEVICE, PRINTING SYSTEM, AND DATA PROCESSING METHOD FOR THE PRINTING SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To effectively use picture information resources registered in a printing device as common picture information resources of respective information processors on a system and to freely construct various printing processing environments.

SOLUTION: A host 51 judges the update state of a resource file 64 identifying prescribed picture information held by a printer 63. If PRTC (printer controller) in a host computer obtains the held resource file 64 from the printer 63 when second resource information held by the printer 63 is judged to be updated, a printer resource file monitor processing part updates a resource file 52 and the like held by RAM in the host computer based on the resource file 64.

LEGAL STATUS

[Date of request for examination] 28.12.1999

[Date of sending the examiner's decision of rejection] 10.02.2004

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]	
[Patent number]	3610141
[Date of registration]	22.10.2004
[Number of appeal against examiner's decision of rejection]	2004-04978
[Date of requesting appeal against examiner's decision of rejection]	11.03.2004
